

GENUINE DVB-9120

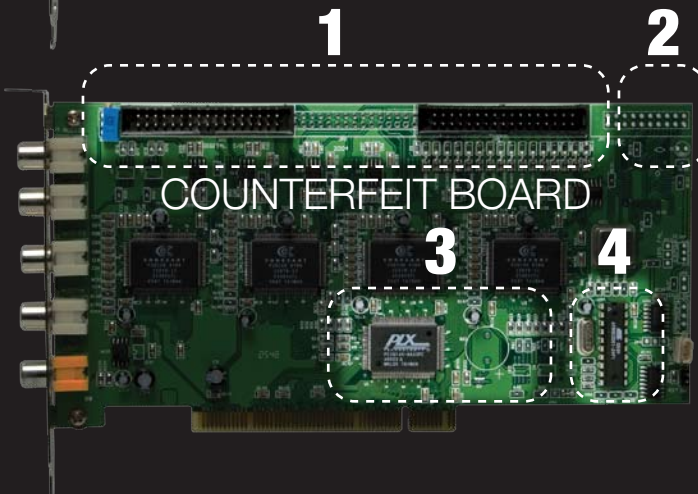

COUNTERFEIT DVR CAPTURE BOARD RECOGNITION GUIDE

1. 2 connectors in genuine board are much closer each other than ones in counterfeit board.

2. Revision number is clearly printed on right-hand top corner on genuine board where counterfeit board doesn't have one.

3. Counterfeit board is using much lower grade chip and missing a necessary part.

4. I/O ROM is soldered on counterfeit board, you cannot replace once chip goes wrong. And genuine board has printed label with model number on the top.
