

• 66 / 110 TERMINAL BLOCK USE

Make consistent punch down connections with this premium impact tool. Use the hook to trace wires from a bunch or to pick one wire from a block. Sparger tool removes modules from Krone blocks without damage.

The Impact Punch down Tool terminates shielded or not shielded, twisted-pair cables to 110 or 66 block connections. It features adjustable impact levels for different-size cables, allowing you to work quickly and efficiently. Once you've used it, you'll wonder how you ever got along without it.

Here's an economic solution for terminating your cables. Every tool is construed with high-quality materials and perform as well as name-brand products.

- For termination of telephone and high-speed network data cables
- Impact punch down tool with impact mechanism inside divided from a turnable body
- Rugged frame with storage compartment in the body of the tool for storing one blade
- Blades are easily changed without using a screw driver
- Seats & trims wire in 110 & 66 style cross connects.
- Spring loaded for fast wire seating and termination.
- Bayonet style blade retention mechanism.
- Interchangeable blades made from high carbon tool steel.
- Spare blade storage compartment in the handle.
- Includes Two 110/66 Combination Blades

TO-L36 Impact Punch Down Tool

Rotary Coax Cable Stripper

• RG58 / RG59 / RG6 • 3 BLADES DEPTH ADJUSTABLE

This will perform two and three-level stripping of coaxial cables, stripping the outer jacket, braided shield and inner dielectric. The adjustable blade depth works well for different coaxial cable thicknesses. This coax cable stripper makes it easy to have the right preset stripper for the job. If you need to adjust the blades, simply use the included hex key that makes it easy to set the new cutting depth. Self-regulating tension means that you don't have to hold the jaws down on the cable. Just insert the cable and spin the tool in the direction of the arrow on the side.

Used by professional cable installers who need to make precise strips on either RG58, RG59, RG6 cables. Simply squeeze the tool to insert the cable, release and spin it using the extra-large finger hole.

- 3 blades ensure accurate stripping length of each cable section.
- Easily adjustable blade depth for different cable thicknesses
- Self-regulating stripping method
- Pre-set strip lengths to work for most common connectors
- Economical price with high-quality performance
- Built-in hex screws for accurate depth-of-cut adjustment.
