

NO FUSE REPLACE EVER
NON-FUSE
BREAKER

A circuit breaker is an automatically-operated electrical switch designed to protect an electrical circuit from damage caused by overload or short circuit. Its basic function is to detect a fault condition and, by interrupting continuity, to immediately discontinue electrical flow. Unlike a fuse, which operates once and then has to be replaced, a circuit breaker can be reset to resume normal operation.

- Regulated Power Supply (DC Model)
- Easy Installation
- High Amps Output makes Ideal for IR Camera Installation (on certain models)

DC POWER SUPPLY

TR W12VDC04P05A

- DC 12V / 5.0A
- Approx. Max 1200mA per Channel

DC POWER SUPPLY

TR W12VDC09P05A

- DC 12V / 5.0A
- Approx. Max 500mA per Channel

AC POWER SUPPLY

TR W24VAC09P25A

- AC 24V / 2.5A
- Approx. Max 270mA per Channel

TR W12VDC04P10A

- DC 12V / 10A
- Approx. Max 2500mA per Channel

TR W12VDC16P10A

- DC 12V / 10A
- Approx. Max 625mA per Channel

TR W24VAC16P05A

- AC 24V / 5.0A
- Approx. Max 310mA per Channel

TR W12VDC08P13A

- DC 12V / 13A
- Approx. Max 1625mA per Channel

TR W12VDC16P25A

- DC 12V / 25A
- Approx. Max 1562mA per Channel
